

POOGINOOK 2019 RAM SALE

240 Rams - On Property
12.30pm Tuesday 24 September 2019

Pooginook
Merino and
Poll Stud

Welcome to the 2019 Pooginook Merino and Poll Merino Ram Sale

*Big investment in
accurate data = big
returns for clients*

*Commercial breeding
focus = genetics to
enhance profit drivers*

*Balanced visual and
measured traits = quality
wool alongside growth
and carcass*

*Scale, depth and
consistency = more
selection opportunity*

Wow – what a tough season it has been! Mother nature has certainly given us a few challenges to deal with in most areas. One positive for the industry are the great prices on offer in the sheep game for both meat and wool. And what will re-stocker sheep be worth when it does rain?!

Effective feeding has ensured we have been able to collect accurate ASBV data to assist with your ram selections. This year we also provide an ASBV for Number of Lambs Weaned (NLW) which has been made possible through our continued investment in DNA and pedigree programs.

During the past 12 months the 2018 drop rams have been run commercially and managed in weight groups to meet target

weights thus ensuring their genetics have been expressed. You can be assured the visual and measured traits will reflect the ram's genetics.

Thank you for your continued support. At Pooginook we strongly believe that an investment in genetics is a sound investment with quality products always selling well – even in a tough climate.

I hope you have a successful day at the sale and welcome feedback about the sheep and how we can help you achieve your breeding objectives.

John Sutherland
Pooginook Manager, 2019

Pooginook's Goal

To provide advanced Merino genetics that result in profitable Merino flocks for our clients.

Auction Registration

All prospective buyers must register by 11am on the sale day. Outside agents are welcome and must register prospective buyers by 11am on the sale day to gain a rebate.

Delivery

Sheep sold on the day must be taken from Pooginook by Tuesday 1 October 2019. All care will be taken of the rams, however responsibility for loss or injury will be borne by the vendor from the fall of the hammer. We recommend Livestock Insurance for all rams.

Fibre Diameter Analysis

Riverina Wool Testers, using CSIRO Laser Scan, tested the rams on 19 August 2019. The rams had 6.0 months wool growth at the time. This information should be used only as a guide. Paraway Pastoral Company Limited accepts no responsibility for the accuracy.

Health Status

Pooginook is a Brucellosis Accredited Free Flock and has Nationally Accredited Johnes Disease Market Assurance Status MN3.

The Pooginook Stud Flock has Owner-declared footrot free status.

Auction Selling Agent

Landmark Mills Finley and Elders. Pooginook rams are sold exclusive of GST.

Pooginook Semen Marketing Policy

All Pooginook rams purchased are sold under the condition that 100% of the semen marketing rights are retained by Paraway Pastoral Company Limited.

If you purchase a Pooginook Ram:

1. The purchaser/s must be nominated at the point of sale.
2. You can use semen by the ram for your own flock requirements.
3. Under this selling agreement you are not permitted to market semen from the ram.
4. Semen marketing rights can be negotiated with Paraway Pastoral Company Limited.
5. If the ram is re-sold the purchaser must be made aware that the semen marketing rights are retained by Paraway Pastoral Company Limited.

Average of 160 Poll Rams Lot 1-10, 41-80, 131-240

FD	CV	SD	CF	BWT
20.6	16.0	3.3	99.1	87.1

Average of 80 Horn Rams Lot 11-40, 81-130

FD	CV	SD	CF	BWT
20.5	16.2	3.3	99.1	87.6

Rams born mid May-June 2018

- Wool mid side tested 19 August 2019
- Shorn and fleece weighed 7 May 2019
- Bodyweight taken on 27 August 2019

Code for Lots:

- Merino
- Poll
- Horned Poll

Measured Performance Data

Sire	Sire of ram (See sire reference)
BT	Birth type (single, twin, triplet)
FD	Fibre diameter (Laser scan micron test)
CV	Coefficient of variation of fibre diameter
SD	Standard deviation of fibre diameter
CF	Comfort factor (No. of fibres under 30 micron)
BWT	Bodyweight in kilograms (measured 27 August 2019)

Pooginook information collection team

Australian Sheep Breeding Values for the Pooginook 2018 drop rams

Pooginook has been benchmarking itself across the industry through entry of sires into sire evaluations and the Sheep CRC Information Nucleus flock. This has put the Pooginook flock in the position to have 'across' flock ASBVs for our sale rams. This year we are offering across flock ASBVs that will assist you with your ram selections.

ASBV Average of Poll Rams Lot 1-10, 41-80, 131-240

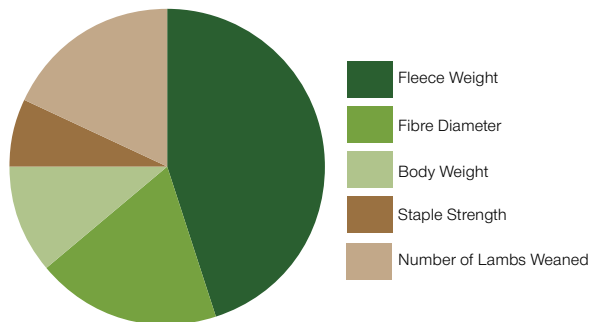

PWWT	YWT	YFAT	YEMD	YFD	YCFW	NLW	MP+
5.0	7.2	-0.3	-0.2	-1.1	18.8	3.4%	155

ASBV Average of Horn Rams Lot 11-40, 81-130

PWWT	YWT	YFAT	YEMD	YFD	YCFW	NLW	MP+
4.3	5.7	-0.8	0.0	-1.4	16.3	-0.8%	147

Index

In 2015 Sheep Genetics revised the MERINOSELECT Merino Production Plus index (MP+). The relevant weights are:

PWWT	Post Weaning Weight. Animals with a positive figure will produce lambs that grow faster up to 200 days.
YWT	Yearling Bodyweight. Animals with a positive figure will produce lambs that grow faster. Data is in kilograms.
YFAT	Describes the fat depth at a consistent weight at 12 months (measured in millimeters).
YEMD	Describes the genes for muscle depth at a constant weight at 12 months (measured in millimeters)
YFD	Yearling Fibre Diameter. A negative figure in fibre diameter measured as a yearling at 300 days means the ram is carrying the genes to reduce fibre diameter at yearling age in its progeny. Data shows difference in micron.
YCFW	Yearling Clean Fleece Weight. A ram with a positive figure is more likely to produce progeny with a higher fleece weight. Data shows difference in percentage of clean fleece weight.
NLW	Number of lambs weaned. The higher the NLW breeding value for a ram the better reproduction you can expect from its daughters.
Index	MP+ is a guide with high emphasis on growth, fleece weight and number of lambs weaned. Moderate emphasis is also placed on CV, FD and SS.

Weaner management workshop on Pooginook whilst weaning this year.

Tips for Production of Commercial Merinos

- Shear rams twice per year and keep rams in Score 3-4. Ensure ewes are Score 3-4 at mating and on a rising plane of nutrition
- Check rams physical soundness
- 2.00% mature rams only joined to maiden ewes
- Join rams @ 1.25% to 1.50% to mature ewes
- Join for 6 weeks only and use wether teasers
- Scan 6 weeks after rams are out for single, multiple and dry ewes
- Ensure single lambers remain in Score 3 condition and ensure twin lambers graze the best pasture and Score 3-4 condition
- Maiden ewes require extra nutrition to achieve good production
- Bait foxes prior to and during lambing and use Alpacas as guardians
- 2 weeks prior to lambing separate twin bearing ewes into mobs less than 200 and single bearing ewes into mobs less than 500
- Twin ewes perform best with multiple watering points, good shelter and best available pasture
- Separate wet ewes from dry ewes at marking
- Wean lambs when the oldest lamb is 12 to 14 weeks
- 6:1 vaccinate for 2nd time and drench onto fresh pasture and periodic worm resistance test
- Use Alpacas in weaner lambs
- Body weigh weaners and monitor over summer months. Don't forget to monitor worm burden
- Ensure weaners achieve targeted body weights up to 12 months
- As a guide maintain weaners at Score 3 and aim for 50kg at 12 months

Tips for Production of Commercial Merinos

Ram Care Guide

Your rams are an investment in advanced sheep and wool production.

General Care of Rams

- Run in a paddock with other Merino rams with good pasture. PGK rams are Accredited Brucellosis free and National Accredited Johnes Disease Market
- Assurance Status MN3 avoid running them with Prime Lamb sires
- Shear rams twice a year
- Apply fly preventative chemical around horns prior to joining
- Drench to a program. We recommend worm testing before drenching
- Graze in a well watered, well sheltered, good paddock all year around
- We recommend an annual vaccination of 6:1

Eight Weeks Prior to Joining

- Feed 400-500gms of lupins a day
- Shear rams 8-10 weeks prior to joining
- We recommend the use of teasers if joining October to December
- Check for testicle abnormalities and size

After Joining

- If necessary supplement feed and put rams in a good paddock to regain condition
- Maintain sires at Score 3
- Class rams annually and check for soundness
